

## Jaxstream Announces JaxCam Video Surveillance Software

***New Windows Based Software Enables Low-Cost Surveillance and Remote Monitoring Solutions for Digital Home***

**Cupertino, CA – July 15, 2005** – Jaxstream Inc., a leading provider of advanced video codec, graphics, and display multimedia solutions for the digital-media markets announced today JaxCam™, a new Windows based video surveillance software to enable low-cost security surveillance and remote monitoring solution on PC platforms.

JaxCam™ software is both an advanced surveillance system and multiple-channel media player. It is designed for the use in digital home. Consumers can turn their home PC and USB webcam into advanced digital surveillance system, without the need to purchase any expensive hardware equipment.

JaxCam™ is simple to use and yet powerful in features. It enables users to manage almost unlimited cameras at once by receiving and encoding the video feeds in real-time. Users can configure the program to detect motion in the monitored area, send off alarms, and upload captured video in an array of methods such as email and FTP for remote viewing and monitoring. They can also archive, manage, and browse recorded video within the same program.

"JaxCam™ is part of our vision for future digital homes," said Shaun Zhang, Manager of Digital Home Software at Jaxstream. "Our goal was to deliver the most user-friendly and yet powerful digital home software products for consumers to turn their PC computers into useful tools that have greater impact to their life style."

### **Key features of JaxCam™**

- Support all USB cameras, Windows compatible capture devices and frame grabbers.
- Support simultaneous recording from multiple cameras.
- Allow video caption with time stamps and images.
- Support advanced motion detection with sensitivity adjustment.
- Allow custom area for motion detection.
- Support various modes of alarm alert.
- Provide event scheduler for video surveillance.
- Manage captured video with video logger and thumbnails.

### **Pricing and Availability**
